# STRAWBERRIES

SENATOR DUNLAU (per)—Has a perfect blossom, is hardy, productive, of good quality, especially splendid keeper, and is able to hold its own under any rough and tumble methods of culture, free from rust. The plant is wonderfully productive and brings every berry to maturity. It resembles the Warfield in size and color, ripens at the same time and remains in bearing longer. When canned it is one of the richest varieties known. To produce a full crop it needs no other variety planted with it. It stands today the leading market berry among all the fruit growers.

COOPER—The largest and best strawberry ever introduced. Berries enormous in size; plenty of the berries are 5 to 6 inches around; 18 to 30 berries fill a quart box. Plants very large and produce 6 to 8 fruit stems to a plant with 8 to 24 berries to a stem; each individual stem 2 to 3 inches long. For hill culture it is wond-

## CHAMPION

*Most Prolific Everbearing Strawberry*

When you plant Champion you are certain of success because three months after planting every mother plant and many runner plants will commence bearing and will continue all summer and fall.

THE EVERBEARING PROGRESSIVE (Per)—Progressive are the earliest of all berries, also the latest, as it bears from very early summer until hard freezing weather. You have a combination of the earliest and the latest, sweetest and most productive. If you've missed this every season don't do so again.

A good time to plant grape vines is in the fall. Get our prices in September for fall planting.

*Certificate of inspection accompanies each shipment*
